

Cognitive Robotics (MCSE606L)

Digital Assignment

Faculty – Dr. Goutam Majumder

Last Date to upload in VTOP – 20/3/2023

---

Both the questions are compulsory

1. How do agents balance exploration and exploitation in reinforcement learning, and what are some of the strategies used to address this challenge?
2. How do sensors and actuators work together in robotics to enable robots to interact with their environment and perform tasks?

Instructions:

- Assignment should be in handwritten mode only
- After finishing your writing take snapshot and make pdf and upload it in VTOP.
- Your name and registration number must be properly highlighted in the answer sheet.
- After the due date assignment will not be considered in any other mode as WhatsApp or Email.
